Green Credentials:

- Home battery storage system
- In-roof solar panels
- Smart power controls
- Electric vehicles and home charger

Context:

- 5 bed home built in 1962
- In-roof PV and battery were installed July 2023 as part of house extension and reroof
- New extension built 2024
- Two EV household for 4 years, using Octopus smart tariffs for both gas and electricity
- PV is an in-roof (no tiles underneath) system
- We also upgraded our supply to 3 phase which allows us to export up to our maximum PV capacity (8kW) rather than the standard 3.68kW G98 limit.
